

Inspections

Relevant Legislation:

Safety Reps and Safety Committee Regulations (SRSC) (sets out **Health and Safety Reps statutory functions**)

Reg 5(1) – formally inspect the workplace every 3 months or more frequently if agreed with management.

Reg 6(1) – Inspect after a notifiable accident, dangerous occurrence, or notifiable disease

Reg 5(2) Inspect after a substantial change in working conditions

Reg.5(2) – Inspect after new information has become available from the Health and Safety Executive (HSE)

Reg.7: Inspect relevant documents and information necessary to fulfil function

One of the main functions of a safety rep is to carry out inspections.

Arrangements for quarterly or other more frequent inspections will be normally agreed with the employer. Agree the frequency, notice, timing and type of formal inspections.

Plan the date time and venues for the inspections.

Notify your members that an inspection is taking place.

During the inspections observe how people are working, talk to the staff in the area, inspect relevant documents.

Complete an inspection report including date, time and details of the inspection.

Provide your employer with a copy .

Meet with management about the inspection report and follow up any remedial action necessary.

Report outcome of discussion to your members and

Escalate anything that is unresolved.

Risk Assessment (RA)

Relevant Legislation:

Management of Health and Safety at Work Regulations 1999 (Sets out **employers duties**)

Reg 3 – employers must conduct suitable and sufficient risk assessments

Reg 4 – requires employer to control hazards at source

Reg 7 – employer must appoint competent persons to conduct RA

Reg 10 – workers must be given comprehensive and relevant information about risks

Reg 13 – employers must ensure workers are capable and trained

Reg 16/19 – RA must take account of women of child-bearing age and young people's risks.

The risk assessment process needs to be practical and take account of the views of employees and their safety reps deciding on preventative and protective measures and implementing those requirements in the workplace

Risk assessments should not be confused with workplace inspections. Inspections seek to identify hazards and problems. Risk assessments are part of the risk management process to identify hazards, evaluate the risks, record the findings, recommend precautions to lead to safe systems of work and review progress.

It is the responsibility of the employer to carry out RA's. TU safety reps can play an important part in the risk assessment process as they have a wealth of experience and a detailed knowledge of the workplace and the jobs that are being done.

Facilities and Time off for functions and training

Relevant Legislation

SRSC Reg 5(3); SRSC Reg 6(2); SRSC Reg 4A(2) - Facilities: Employers shall provide such facilities and assistance as safety reps may reasonably require

SRSC Reg 4(2) – Employers must permit time off with pay during working hours

SRSC Regs- A safety rep may present a complaint to an employment tribunal within 3 months if the employer **has failed to permit time off for functions or training or if the employer has failed to pay for time off.** (Introduction (9))

Employers are required to 'provide such facilities and assistance as the safety rep may reasonably require'. The TUC believes these should include: office space, equipment and a filing cabinet, telephone/computer access including email and internet, photocopying, notice board, meeting room, technical equipment like a lightmeter, camera, technical advice.

Safety reps have the right to paid time off work to carry out their functions. This is not specified, **is as much time as required** and will vary according to the role and workplace. **It is not facility time.** It is important to organise to secure sufficient time off and pursue through TU structures if there is a problem.

ASAP after appointment H&S reps should receive training, these courses should be TUC or union approved

Safety reps are entitled to time off with pay to attend. They should also be supported with additional update training.

Challenging Workplace Stress

Relevant Legislation

There is no specific law dealing with stress, however under the Health and Safety at Work Act the employer has a duty to ensure the health, safety and welfare of employees.

Management of Health & Safety at Work Regulations require employers to use risk assessments to identify hazards and evaluate risks and the HSE have developed a set of Management Standards to support employers with conducting a stress RA.

<http://www.hse.gov.uk/stress/standards/>

The principles set out in SRSC Regs to setting up health and safety committees should be applied to setting up a Stress Steering Group: This should be 'a representative group to steer and drive action forward'.

www.hse.gov.uk/stress/standards/steering.htm

What can the trade union health and safety committee do about stress?

- Ensure management is complying with legal duty to act. If not raise an HSE concern form- <https://extranet.hse.gov.uk/lfsrserver/external/turep1>
- Carry out mapping of workplace, surveys to identify areas of prevalent stress
- Put up posters and leaflet on the issue
- Hold meetings with workers on stress
- Carry out workplace inspections on stress
- Ensure reps are involved in stress RA process
- Encourage workers to record any stress-related incident in the accident book
- Attend training on stress awareness

Some Important Dates

Day	Month	Title
	Jan	1976 – 1 st issue Hazards Bulletin
10	Jan	1985 – Putney domestic gas explosion – 8 killed
4	Feb	World Cancer Day
5-6	Feb	2004 – Morecambe Bay cockle-pickers – 21 killed
9	Feb	2015 – Bath tipper truck – 4 killed
15	Feb	2004 - Tebay railway – 4 killed
23	Feb	2016 – Didcot boiler house collapse – 4 killed
12-15	March	2011 – Fukushima nuclear accident Japan
6	March	1987 – Herald of Free Enterprise Zeebrugge – 193 killed
8	March	International Women's Day
	March	National Apprenticeship Week
18	March	1834 – Tolpuddle Martyrs
